

## INSTRUCTIONS FOR:

- CamVane
- CamVane HC

### STORAGE

- Store, transport and handle with aluminium profiles standing vertically
- Store in a dry and clean place

### HANDLING INSTRUCTIONS

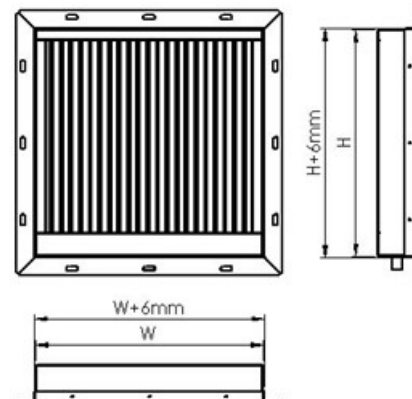

- Handle with care to avoid damages to the weather louvres

### INSTALLATION

- Install vertically with the drainage holes downwards so that the water can drain off properly
- CamVane HC must be installed by a qualified electrician

### MAINTENANCE

- Assessment of appropriate service interval must be made locally, Camfil recommends cleaning the louvres at least one time per year
- Make sure drainage holes are free of debris so that the water can drain off properly
- During colder periods it is important to inspect the louvres frequently and prevent ice from building up
- Weather louvres that have reached end-of-life are disposed of in accordance with local regulations
- The weather louvres can be cleaned with water and a mild detergent
